Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 1 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Amendment Entry

Applicants' timely response to the Office Action mailed on September 7, 2006 has been acknowledged. Currently, applicant has cancelled the rejected claims 1-15 and has presented new claims 16-37.

Response to Arguments

Applicant's arguments with respect to the previous Office Action have been considered but are moot in view of the newly presented claims 16-37. A restriction has been set forth below because the new claims lack unity of invention.

Election/Restrictions

Newly submitted claims 16-37 are directed to inventions which are not so linked as to form a single general inventive concept under PCT Rule 13.1 and therefore the examiner is requiring applicant to elect a group to be examined on the merits.

Restriction is required under 35 U.S.C. 121 and 372.

This application contains the following inventions or groups of inventions which are not so linked as to form a single general inventive concept under PCT Rule 13.1.

In accordance with 37 CFR 1.499, applicant is required, in reply to this action, to elect a single invention to which the claims must be restricted.

Art Unit: 1655

Group 1, claim(s) 16-21, 30 and 37 are drawn to method of preparing a fodder, nutriment or premix, a fodder and a method of using the fodder or nutriment to enhance weight gain in animals.

Group II, claim(s) 22-29, 31-33, 35-36, drawn to methods of decreasing the likelihood of mycoplasma infection and infectious disease in an animal.

Group III, claim(s) 34 is drawn to a method of reducing coccidiosis in an animal.

The inventions listed as Groups I-III do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, they lack the same or corresponding special technical features for the following reasons: Group I special technical feature appears to be enhancing weight gain, which is not shared by the method of Group II (Group II does not require the step of enhancing weight gain). The special technical feature of Group II is decreasing the likelihood of mycoplasma, which is not shared by the special technical features of Group I or III. Group III special technical feature appears to be a method of reducing coccidiosis in an animal, which is a different special technical feature from Group II mycoplasma infections.

Applicant is advised that the reply to this requirement to be complete must include (i) an election of a species or invention to be examined even though the requirement be traversed (37 CFR 1.143) and (ii) identification of the claims encompassing the elected invention.

The election of an invention or species may be made with or without traverse. To reserve a right to petition, the election must be made with traverse. If the reply does not distinctly and specifically point out supposed errors in the restriction requirement, the election shall be treated as an election without traverse.

Art Unit: 1655

Should applicant traverse on the ground that the inventions or species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the inventions or species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C.103(a) of the other invention.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Deborah A. Davis whose telephone number is (571) 272-0818. The examiner can normally be reached on 8-5 Monday thru Friday.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, McKelvey Terry can be reached on (571) 272-0775. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.
